jakarta office

contemporary elegance with cultural flair

the theme requested by the client for their new office is a contemporary elegance infused with elements of local culture, particularly focusing on batik ornament that inspired by local Indonesian culture fabric. the aim is to create a professional yet inviting atmosphere that reflects the company's commitment to both modern financial services and its roots in the local community.

bni innovation hub

jakarta office

bni digital hub tried to explore the new way of working with combinations of seating and space configurations, mix with technology so that to achieve better connection between **bni digital hub** around indonesia.

with a touch of local features in some areas, make the space still have an indonesia identity but also do combine with modern, industrial and futuristic ambience to represent **bni** nowadays working culture by using local material such as rattan

jakarta office

security is one of the most important key element to the overall design & the materials selection for this project.

we managed to change owner's previous conventional enclosed office layout to open office concept and we implemented a **modern design** with a **contemporary theme** by adapting **clean lines** and **light colored material** that also creates **warmth feeling**.
