PLANETARIUM JAKARTA

PUBLIC SPACE

The style that will be used in the Jakarta planetarium is futuristic. The concept of futuristic style refers to the latest technological advances so that it can help shape a vision of an innovative and modern future, visitors can feel it through immersive

One of the applications of the modern concept at the Jakarta Planetarium is the digital library that not only provides access to a wide collection of information and reading materials in digital format, but also allows visitors to access educational materials, scientific journals, and astronomy-related references from various global sources. With this library, visitors can expand their knowledge of the universe through digital technology that is practical and easily accessible, both in person at the planetarium and remotely through online platforms.
