## INDONESIA FINANCIAL GROUP JAKARTA

The Indonesia Financial Group (IFG) office in Jakarta redefines the typical image of BUMN spaces, merging vibrant design elements with a modern, dynamic approach. Located on a single floor with a generous 1,100 sqm layout, the office reflects IFG's progressive spirit, moving away from the conventional rigidity often seen in state-owned enterprises. The design is a bold, forward-looking statement, emphasizing vibrant colors and open, collaborative spaces that capture the essence of a financial institution poised to redefine its role in the industry.

Upon entering the office, visitors are greeted by a lively and welcoming atmosphere. The layout is thoughtfully organized, with open-plan workstations, meeting rooms, and collaborative zones that facilitate interaction and connectivity. This sense of openness is further enhanced by the strategic use of glass partitions and large windows that flood the space with natural light, creating a bright and inviting environment.

## JAKARTA

Art plays a pivotal role in the design narrative, with bold graphics and colorful murals that inject personality and energy into the space. These elements are not just decorative; they embody IFG's values, showcasing a blend of modernity and cultural relevance.

Social spaces are carefully integrated into the overall design, offering employees a chance to unwind, collaborate, or hold informal meetings. These lounges and breakout areas are furnished with comfortable seating and accentuated by pops of color, adding to the sense of a cohesive community within the office. The design prioritizes flexibility, allowing these spaces to be used for a range of activities, from brainstorming sessions to moments of relaxation.

The overall design of the IFG office exemplifies a new direction for state-owned enterprises, where innovation, vibrant design, and a modern work culture take precedence. By incorporating bold colors, open layouts, and artful touches, the space not only meets the functional needs of a busy office but also embodies the dynamic and progressive identity of IFG. This project stands as a shining example of how thoughtful design can redefine traditional corporate spaces, creating an environment that is both inspiring and functional, and perfectly aligned with the company's forward-looking vision.

Project : Indonesia Financial Group  
Location : Gedung Graha CIMB Niaga - Jakarta Selatan  
Area : 1100 sqm  
Scope of Work : Interior Design Consultation

# VALE BASE METAL INDONESIA JAKARTA

At the heart of Jakarta's bustling SCBD area lies VALE Base Metal Company's representative office, a stunning 480 sqm space that redefines corporate interiors with a distinctive Indonesian touch. Our design approach for this project was to harmonize modern sophistication with the rich cultural heritage of Indonesia, resulting in a workspace that stands out both locally and globally.

From the moment you step inside, the interplay of sleek, clean lines with traditional Indonesian patterns and materials is immediately apparent. The office's design thoughtfully integrates local motifs, reflecting the vibrant cultural tapestry of Indonesia. Handcrafted batik patterns adorn the walls, while natural teak wood and rattan elements bring warmth and authenticity to the contemporary space. The use of local materials not only adds a unique character but also supports sustainable practices by reducing the carbon footprint associated with long-distance material transport.

# VALE BASE METAL INDONESIA JAKARTA

The color palette is inspired by the natural beauty of Indonesia, with earthy tones and vibrant accents that mirror the country's diverse landscapes. This thoughtful incorporation of colors creates an inviting and dynamic environment, fostering both productivity and creativity among the VALE team.

One of the highlights of the design is the seamless blend of old and new. Local Indonesian pattern & material are displayed alongside cutting-edge office furniture, creating a dialogue between tradition and innovation. The spacious layout includes open-plan workstations, private meeting rooms, and collaborative zones, all designed to enhance functionality while maintaining aesthetic appeal.

The local influence extends beyond mere aesthetics; it permeates the very atmosphere of the office. The design promotes a sense of community and connection, reminiscent of Indonesian communal spaces, encouraging collaboration and interaction among employees. Large windows allow natural light to flood the space, further enhancing the sense of openness and well-being.

This project exemplifies our commitment to creating spaces that are not only visually striking but also culturally resonant and environmentally responsible. The Jakarta office of VALE Base Metal Company is more than just a workplace; it's a testament to the possibilities of blending modern design with cultural heritage, providing a unique and enriching environment for all who enter.
