

# TUJUWAN LOUNGE

## DEVATA NATURAFUTURISM

Tujuwan Lounge at I Gusti Ngurah Rai International Airport presents the concept of “Devata Naturafuturism,” a modern and elegant design blending Bali’s natural beauty with futuristic elements. This lounge is designed to deliver a unique experience for travelers, combining premium materials such as marble and metal, nature-inspired lines that reflect Bali’s cultural identity in a contemporary setting.

Tujuwan Lounge is operated by PT Jasa Angkasa Semesta (JAS), a leading Indonesian airport service provider established in 1984.

## DEVATA NATURAFUTURISM

The design integrates authentic Balinese culture into a modern setting, with Endek textile patterns applied to lighting features and backdrops, creating depth and authenticity. A marble reception desk with ocean wave patterns greets visitors with warmth and elegance. The use of bright colors paired with metal accents further enhances the futuristic and welcoming ambiance, reflecting both innovation and respect for Indonesia's heritage.

Key features include an Indoor Seating Area with dividers for privacy, an organic-shaped Buffet Area, and a Bar Seating Area strategically placed as a central hub. A parametric column cover inspired by trees stands as an iconic element, while Endek Patra motifs enrich the interior. The VIP Room offers flexibility with glass partitions, and the Outdoor Seating Area provides a calm, relaxing atmosphere.
