

EFFORTLESS LIVING

Elevating Compact Living with Style

This project has been meticulously crafted with a tropical-inspired style, bringing fresh, natural, and calming vibes to every corner. Every element is carefully considered to balance aesthetic beauty with practical functionality, while clever multifunctional features throughout maximize efficiency without sacrificing a sense of openness. Despite its compact footprint, the apartment creates a bright, comfortable, and serene living environment in the heart of Jakarta, demonstrating that even urban living on a smaller scale can feel spacious, welcoming, and truly inviting.

SMALL SPACE, BIG COMFORT

Making Small Spaces Feel Spacious Welcoming

Every corner of this apartment is designed with smart, functional solutions, creating a living experience that is both comfortable and flexible. The murphy bed folds away to open up the space, which can be transformed into a relaxation or activity area.

Meanwhile, the moveable table facing the outside offers a refreshing view while serving as a comfortable workspace or dining area, and integrated storage ensures every corner adapts to daily needs. Every detail is thoughtfully crafted, creating a clean and organized layout, proving that even with limited space, the home feel spacious, comfortable, and full of life.
