

INFINITY TOWER APARTMENT

This project transforms a vertical apartment into a multigenerational living area, where each floor is tailored to reflect the personality, lifestyle, and needs of individual family members while preserving a unifying design narrative throughout the building, the idea celebrates diversity by stacking several yet complementary living spaces inside a single home.

INFINITY TOWER APARTMENT

The overall idea of this apartment is a modern, luxurious, and classically inspired space. A feeling of refinement and luxury is introduced by the marble flooring and rich dark wood paneling. While each level celebrates individuality, the building maintains continuity through recurring design elements for instance, a cohesive material palette, consistent lighting strategies, and vertical circulation accentuated by shared themes.
