

DENTINE

DENTAL CLINIC

This dental clinic is located in commercial area at Fatmawati, South Jakarta. As we know the most important requirement for the clinic is to look clean and hygiene. Our design aligns with the main ideas of the clinic itself which is clean and simple. To enhance the simplicity and the clean look, we are playing with the nude color such as taupe, beige and grey. But to make it unique and looks elegant, we create curves on the wall, ceiling, and furnitures. In addition, the indirect lighting play the role, to make the clinic looks more elegant especially on the shadow line. Apart from elegancy, the shadow line also works as guidance for the clinic flow and patient pathways.

DENTINE DENTAL CLINIC

This dental clinic is two storey clinic but the space is relatively small for a dental clinic. The challenge is to make two polyclinic that look spacious, could accomodate the needs and have one polyclinic in each floor. According to this, On the first floor, the polyclinic is located under the stairs to maximize the space. Additionally, we created the cabinet underneath the stairs, to make the stairs stucture hidden and make it camouflage with the curve on top of it and we added indirect light. We also use the space on second floor hallway for sterile room to ensure the space is enough for all room needs. To strengthening the concept of Dentine, we adopted a bright theme, which we also play with the natural light and nude colours.
